

Question 4

Objective Requirements

Display a list of products using React.
Create an array:

```
const products = [  
  { id: 1, name: "Laptop", price: 50000 },  
  { id: 2, name: "Mobile", price: 25000 },  
  { id: 3, name: "Headphones", price: 2000 }  
];
```

Write a react component to display the output on the browser
should be as follows

```
Laptop    $50000  
Mobile    $25000  
Headphones $2000
```

Product List

NAME	PRICE
Laptop	\$50,000
Mobile	\$25,000
Headphones	\$2,000

```
App.jsx  productlist.jsx  App.css 6  
Assessment > Question4 > productlist > src > component > productlist.jsx > ProductList  
1  import "../App.css";  
2  
3  function ProductList() {  
4    // Product Array  
5    const products = [  
6      { id: 1, name: "Laptop", price: 50000 },  
7      { id: 2, name: "Mobile", price: 25000 },  
8      { id: 3, name: "Headphones", price: 2000 }  
9    ];  
10  
11    return (  
12      <div className="product-list-wrapper">  
13        <h2>Product List</h2>  
14  
15        <table className="product-table">  
16          <thead>  
17            <tr>  
18              <th>Name</th>  
19              <th>Price</th>  
20            </tr>  
21          </thead>  
22          <tbody>  
23            {products.map((product) => (  
24              <tr key={product.id}>  
25                <td>{product.name}</td>  
26                <td>${product.price.toLocaleString()}</td>  
27              </tr>  
28            ))}  
29          </tbody>  
30        </table>  
31      </div>  
32    );  
33  }  
34  
35  export default ProductList;
```

```
App.jsx  productlist.jsx  App.css 6  
Assessment > Question4 > productlist > src > App.jsx > default  
1  import ProductList from "../component/productlist"  
2  import "../App.css"  
3  function App() {  
4    return (  
5      <div>  
6        <ProductList />  
7      </div>  
8    )  
9  }  
10  
11  export default App
```
